

ROLL NO:26K-3131

TASK1:

The screenshot shows the Programiz C Online Compiler interface. The code in `main.c` is as follows:

```
4 int main()
5 {
6     float marks,income;
7     printf("Enter marks percentage: ");
8     scanf("%f",&marks);
9     printf("Enter your family income: ");
10    scanf("%f",&income);
11    if (marks>=80|income<50000)
12    {printf("you are qualified for scholarship\n");
13    }
14    else
15    {
16        printf("You are not qualified for scholarship\n");
17    }
18    return 0;
19 }
```

The output shows the program execution results:

```
Enter marks percentage: 87.9
Enter your family income: 49000
you are qualified for scholarship

=== Code Execution Successful ===
```

TASK2:

The screenshot shows the Programiz C Online Compiler interface. The code in `main.c` is as follows:

```
2 #include <stdio.h>
3
4 int main()
5 {
6     int days;
7
8     printf("Enter number of late days: ");
9     scanf("%d", &days);
10
11    if (days == 0)
12    {
13        printf("No Fine\n");
14    }
15    else if (days >= 1 && days <= 5)
16    {
17        printf("Fine: Rs. 50\n");
18    }
19 }
```

The output shows the program execution results:

```
Enter number of late days: 15
Fine: Rs. 200

=== Code Execution Successful ===
```

TASK3:

The screenshot shows the OnlineGDB website interface. The browser tabs include 'Online C Compiler - Programiz', 'Online C Compiler - online edit', and '(3) WhatsApp'. The address bar shows 'onlinegdb.com/online_c_compiler'. The left sidebar contains navigation links: 'IDE', 'My Projects', 'Classroom new', 'Learn Programming', 'Programming Questions', 'Sign Up', and 'Login'. Below these is a 'wegic' logo and a description: 'Modern, dynamic and visually stunning websites created from a simple business description'. The main editor area shows a C program in 'main.c' with the following code:

```
1 // Online C Compiler.  
2 // Code, Compile, Run and Debug C program online.  
3 // Write your code in this editor and press "Run" button to compile and execute  
4  
5  
6  
7  
8  
9 #include <stdio.h>  
10  
11 int main() {  
12     char name[50];  
13  
14     printf("Enter your full name: ");  
15     fgets(name, sizeof(name), stdin);  
16  
17     printf("Entered Name: ");  
18     puts(name);  
19  
20     return 0;  
21 }
```

The input field at the bottom shows 'Enter your full name: FARHAT'. On the right, there is an advertisement for 'Data Analytics Certificate' from Coursera.

This screenshot shows the same OnlineGDB interface after the program has been executed. The code in the editor is identical to the previous screenshot. The input field now shows 'Entered Name: FARHAT'. The output area at the bottom displays the following text:

```
...Program finished with exit code 0  
Press ENTER to exit console.
```

The right sidebar still shows the 'Data Analytics Certificate' advertisement.

TASK4:

The screenshot shows the OnlineGDB IDE interface. The left sidebar contains navigation links: IDE, My Projects, Classroom (marked as new), Learn Programming, Programming Questions, Sign Up, and Login. The main editor displays a C program named 'main.c' with the following code:

```
1 #include <stdio.h>
2
3 int main() {
4     float length, width, area, perimeter;
5
6     printf("Enter length: ");
7     scanf("%f", &length);
8
9     printf("Enter width: ");
10    scanf("%f", &width);
11
12    area = length * width;
13    perimeter = 2 * (length + width);
14
15    printf("Area: %.2f\n", area);
16    printf("Perimeter: %.2f\n", perimeter);
17
18    return 0;
19 }
```

The output window at the bottom shows the input: 'Enter length: 5.5' and 'Enter width: 3.3'. A Coursera advertisement is visible on the right side of the IDE.

The screenshot shows the OnlineGDB IDE interface after the program has been executed. The code in the editor is the same as in the previous screenshot. The output window now displays the results of the calculations:

```
Area: 18.15
Perimeter: 17.60
...Program finished with exit code 0
Press ENTER to exit console.
```

The Coursera advertisement remains visible on the right side of the IDE.

TASK5:

The screenshot shows the OnlineGDB website interface. The left sidebar contains navigation links: IDE, My Projects, Classroom (marked as new), Learn Programming, Programming Questions, Sign Up, and Login. The main editor area displays a C program in a file named 'main.c'. The program prompts the user to enter an integer, calculates its square and cube, and prints the results. The output shows the square of 16 is 16 and the cube of 16 is 64. The program finished with exit code 0.

Online C Compiler.
Code, Compile, Run and Debug C program online.
Write your code in this editor and press "Run" button to compile and execute

#include <stdio.h>

int main() {
    int num;

    printf("Enter an integer: ");
    scanf("%d", &num);

    printf("Square: %d\n", num * num);
    printf("Cube: %d\n", num * num * num);

    return 0;
}
```

input

Square: 16
Cube: 64

...Program finished with exit code 0
Press ENTER to exit console.

TASK6:

The screenshot shows the OnlineGDB website interface. The left sidebar contains navigation links: IDE, My Projects, Classroom (marked as new), Learn Programming, Programming Questions, Sign Up, and Login. The main editor area displays a C program in a file named 'main.c'. The program prompts the user to enter a temperature in Celsius, converts it to Fahrenheit, and prints the result. The output shows the conversion of 36.9 Celsius to 98.42 Fahrenheit. The program finished with exit code 0.

Online C Compiler.
Code, Compile, Run and Debug C program online.
Write your code in this editor and press "Run" button to compile and execute

#include <stdio.h>

int main() {
    float celsius, fahrenheit;

    printf("Enter temperature in Celsius: ");
    scanf("%f", &celsius);

    fahrenheit = (celsius * 9.0 / 5.0) + 32;

    printf("Temperature in Fahrenheit: %.2f\n", fahrenheit);

    return 0;
}
```

input

Enter temperature in Celsius: 36.9
Temperature in Fahrenheit: 98.42

...Program finished with exit code 0
Press ENTER to exit console.

TASK7:

The screenshot shows the OnlineGDB website interface. The left sidebar contains navigation links: OnlineGDB, code.compile.run.debug.share., IDE, My Projects, Classroom (marked as new), Learn Programming, Programming Questions, Sign Up, and Login. The main editor area displays a C program named 'main.c' with the following code:

```
1 - /*****  
2  
3 Online C Compiler.  
4 Code, Compile, Run and Debug C program online.  
5 Write your code in this editor and press "Run" button to compile and execute  
6  
7 *****/  
8 #include <stdio.h>  
9  
10 int main() {  
11     float num1, num2, num3, average;  
12  
13     printf("Enter three numbers: ");  
14     scanf("%f %f %f", &num1, &num2, &num3);  
15  
16     average = (num1 + num2 + num3) / 3.0;  
17  
18     printf("Average: %.2f\n", average);  
19  
20     return 0;  
21 }
```

The output console shows the program execution: "Enter three numbers: 4 6 7" followed by "Average: 5.67". The status bar indicates "...Program finished with exit code 0" and "Press ENTER to exit console.".

TASK8:

The screenshot shows the OnlineGDB website interface. The left sidebar contains navigation links: OnlineGDB, code.compile.run.debug.share., IDE, My Projects, Classroom (marked as new), Learn Programming, Programming Questions, Sign Up, and Login. The main editor area displays a C program named 'main.c' with the following code:

```
3  
4 Online C Compiler.  
5 Code, Compile, Run and Debug C program online.  
6 Write your code in this editor and press "Run" button to compile and execute  
7  
8 *****/  
9 #include <stdio.h>  
10  
11 int main() {  
12     float marks;  
13  
14     printf("Enter marks: ");  
15     scanf("%f", &marks);  
16  
17     if (marks >= 50) {  
18         printf("Pass\n");  
19     } else {  
20         printf("Fail\n");  
21     }  
22  
23     return 0;  
24 }
```

The output console shows the program execution: "Enter marks: 49" followed by "Fail". The status bar indicates "...Program finished with exit code 0" and "Press ENTER to exit console.".
